

Movie Search using OMDb API

Objective

This project demonstrates how to retrieve movie information from the **OMDb (Open Movie Database) API** using **Python** and the **Requests** library. The application allows users to search for movies by title and displays their details.

🔧 Technologies Used

-  Python
-  Requests Library
-  OMDb API
-  Pandas (Optional)

```
In [1]: import requests
import pandas as pd
```

```
In [2]: API_KEY = "your_omdb_api_key_here"
```

```
In [ ]: movie_name = input("Enter Movie Name: ")

url = f"http://www.omdbapi.com/?apikey={API_KEY}&s={movie_name}"

response = requests.get(url)

data = response.json()
```

```
In [ ]: movies = []
```

```
if data.get("Response") == "True":  
    for movie in data["Search"]:  
        movies.append({  
            "Title": movie["Title"],  
            "Year": movie["Year"],  
            "Type": movie["Type"],  
            "IMDb ID": movie["imdbID"]  
        })  
  
else:  
    print("No results found.")
```

```
In [ ]: df = pd.DataFrame(movies)  
  
df
```

```
In [ ]: df.to_csv("movie_search_results.csv", index=False)  
  
print("CSV File Saved Successfully.")
```

✓ Conclusion

Successfully retrieved movie information using the **OMDb API**. The application searched movies by title and displayed key details.

- 🎬 Movie Title
- 📅 Release Year
- 🎭 Movie Type
- 🆔 IMDb ID

The retrieved data was stored in a **Pandas DataFrame** and exported as a **CSV file** for future analysis and

reference.

Movie Search API Completed Successfully!
